

We are a group of master masons of various regular obediences, who recognise themselves as brother and want to give a concrete, fraternal and neutral contribution to the Masonic communication world. Our mission is to create, or better recreate the union and real universal fraternity spirit above the pure administrative divisions. The world, not only the masonic one, is becoming global and it's our duty to increase our boundaries, always and only in the wake of regularity, orthodoxy, respect and dignity of human being. The news that we report are a contribution of some brothers; we invite every regular brother to [contact us](#) in order to collaborate and send articles with masonic events and moments.
